

The Soil and Water Conservation Society presents:

Career Connections in Conservation

Tuesday, July 24th at 8:30 a.m.

Like science itself, exploring career options often involves investigating the unknown. Now you can learn what you always wanted to know about a career in environmental and natural resource issues by participating in a special symposium at the SWCS Annual Conference.

This 90-minute event is included as a part of your regular conference registration and features expert panelists from government agencies, non-profits, consulting firms, agricultural product representatives and other groups involved with environmental and natural resource issues. This panel is guaranteed to broaden your career horizons – while providing an important networking opportunity.

If you're thinking about a specific career path, or if you just want to know what types of positions are available in the environmental and natural resource arenas, don't miss this interactive symposia.

For more information about the symposia, please contact Keisha Brown at Keisha.Brown@fl.usda.gov

2007 SWCS Annual Conference

July 21-25, 2007 – Saddlebrook, Tampa, FL

Professional Development, Oral and Poster Presentations, Symposia, Technical Workshops, & Educational Tours

The 2007 SWCS Annual Conference Program Committee and the Florida Chapter SWCS are proud to bring you "Conservation Challenges in a Changing Landscape" at the Saddlebrook Resort in Tampa, FL.

This year's conference offers 141 oral presentations, 78 posters, 16 symposia, seven tours, nine workshops and dozens of opportunities to learn and make connections with attendees, exhibitors and speakers in a variety of traditional and non-traditional settings.

The preliminary program with complete descriptions of the workshops, tours and the list of presentations is available online.
