Acknowledgements

The authors are grateful for the funding supplied by USDA National Institute for Food and Agriculture (NIFA) and Natural Resources Conservation Service (Award No. 2007-51130-18575). Without the funding, this work could not have been accomplished. The authors want to thank all NIFA Conservation Effects Assessment Project personnel for their help with this book and with our site visits and information gathering, and in particular, the contact(s) at each project: Indrajeet Chaubey from Purdue University, formerly from University of Arkansas; Jennie Popp from University of Arkansas; George Vellidis from University of Georgia; Jan Boll from University of Idaho; Ron Turco from Purdue University; Phil Gassman from Iowa State University; Nathan Nelson from Kansas State University, Claire Baffaut from USDA Agricultural Research Service; Mary Exner from University of Nebraska; Zach Easton from Virginia Tech University, formerly from Cornell University; Pete Richards from Heidelberg University; Guillermo Giannico from Oregon State University; Robert Brooks from Pennsylvania State University; and Doug Jackson-Smith and Nancy Mesner from Utah State University. In addition, we greatly appreciate all the time spent by key informants during our interviews with them. The authors also wish to thank the USDA Conservation Effects Assessment Project Steering Committee and USDA NIFA Committee for Shared Leadership for Water Quality for their comments, questions, and advise during this synthesis project. We are very grateful to our technical editors, Oksana Gieseman, Jacqueline Pohl, and Annie Binder from the Soil and Water Conservation Society, for their thorough review and patience with this process. A special thanks also goes to Lisa Duriancik of USDA Natural Resources Conservation Service.

Any opinions, findings, conclusions, or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the view of the USDA. The USDA is an equal opportunity provider and employer.

This book is dedicated to the farmers, agency personnel, and many others who work towards agricultural productivity and environmental protection.
