

2005 Fall Conservation Tour

"Water Quality in the Potomac and Anacostia Waterways"

Sponsored by the

**Soil and Water Conservation Society - National Capital Chapter
and
Living Classrooms of the National Capital Region**

Travel the Potomac and Anacostia River by tour boat

Thursday, October 6, 2005, 20 Chapter members and friends met at Gangplank Marina (600 Water Street, SW) in the Washington, DC Marina.

They plied the waters of the Potomac and Anacostia Rivers on the "Half Shell" boat - a classroom on water!

They tested the water and sediment to observe and discuss water quality and related issues in a watershed nearly 14,000 square miles. They discussed sewage treatment, bridge construction, and many other uses in this urban area.

Twenty Chapter members participated in this interesting event. Following are photographs from the day.
