INDEX

A
agrichemical mixing centers (702, 703), 207
air quality effects
agrichemical mixing centers (702, 703), 207
alley cropping (311), 207
anionic polyacrylamide (PAM) erosion control (450), 44, 207–208
bedding (310), 208
conservation buffers, 48
conservation covers (327), 64
correction crop rotation (328), 31
constructed wetlands (656), 208
contour buffer strips (332), 208
contour farming (330), 208
contour orchard (331), 208
cover crops (340), 209
cropland conversion, 64
deep tillage (324), 210
drainage water management (554), 210
filter strips (393), 211
grazed waterways (412), 211
hedgerow planting (442), 209–210
herbaceous wind barriers (603), 209–210
irrigation land leveling (464), 213
irrigation tailwater recovery (447), 213–214
irrigation water management (449), 214
mulching (484), 214
nutrient management (590), 215
ponds (378), 215
precision land forming (462), 213
residue management, 29, 215–218
riparian forest buffers (391), 218, 277
row arrangements (557), 219
saline and sodic soil management (610), 48
seasonal residue management (344), 215–218
sediment basins (350), 220
stripcropping (585), 209, 220
subsurface drainage (606), 220
surface roughening (609), 221
terraces (600), 221
tree/shrub establishment (612), 273–275
water management practices, 122
wetland creation (658), 208
wetland enhancement (659), 208
wetland restoration (657), 208
windbreak/shelterbelt establishment (380), 209–210
windbreak/shelterbelt renovation (650), 209–210
alley cropping (311)
air quality effects, 57
definition, 49
environmental outcomes, 57–58
for pesticide mitigation, 207
scientific documentation, 58–59
soil quality effects, 55–57
water conservation effects, 57
water quality effects, 49–55
Amherst Matrix, 238–242
anionic polyacrylamide (PAM) erosion control (450)
air quality effects, 44
definition, 136
environmental outcomes, 44
in irrigated agriculture, 142
for pesticide mitigation, 207–208
scientific documentation, 44
soil management practice, 42–44
soil quality effects, 42–44
water conservation effects, 44
water quality effects, 42–44
application decisions
categories of, 153
fertilizers, 173–175
manure amendments, 175–179
sound policy for, 179–180
tradeoffs, 180–181
atmospheric transport, 222–223
B
Bear Creek watershed case study, 300–302
bedding (310) for pesticide mitigation, 208
biological controls, 205, 253
brush management (314) for pesticide mitigation, 207
buffer areas, environmental outcomes of, 170–171
buffer strips, see contour buffer strips (332)
C
carbon
residue management effect, 15–20
sequestration, 142
case studies, landscape management, 293–305
channel bank vegetation (322), 289–291
channel stabilization (584), 288–290
chemigation, 138
conservation buffers
air quality effects, 57
environmental outcomes, 57–58
for pesticide risk mitigation, 250–251
scientific documentation, 58–59
sediment transport, 49
soil management practice, 48–59
soil quality effects, 55–57
water conservation effects, 57
water quality effects, 49–55
conservation cover (327)
air quality effects, 67
environmental outcomes, 67–68
for pesticide mitigation, 206
scientific documentation, 68
soil management practice, 64–68
soil quality effects, 66–67
water conservation effects, 67
water quality effects, 64–66
conservation crop rotation (328)
air quality effects, 35
environmental outcomes, 35
for pesticide mitigation, 207
scientific documentation, 35
soil management practice, 31–35
soil quality effects, 31–34
water conservation effects, 34–35
water quality effects, 31–34
conservation practices for pesticide mitigation, 206–221
Conservation Reserve Program (CRP), 64–66
conservation tillage. see residue management
constructed wetlands (656)
landscape management practice, 285–288
for pesticide mitigation, 208
contour buffer strips (332)
air quality effects, 57
definition, 48
environmental outcomes, 57–58
for pesticide mitigation, 208–209
scientific documentation, 58–59
soil quality effects, 55–57
water conservation effects, 57
water quality effects, 49–55
contour farming (330)
for pesticide mitigation, 208–209
soil management practice, 63–64
contour orchard (331)
for pesticide mitigation, 208–209
soil management practice, 64
contour stripcropping. see stripcropping (585)
corn
IPM for, 257
low phytate, 161
corridor connectivity, 276–277
cotton, IPM for, 256–257
cover crops (340)
environmental outcomes, 40–41
for pesticide mitigation, 209
scientific documentation, 41–42
soil management practice, 35–42
soil quality effect, 37–39
water conservation effects, 39–40
water quality effects, 37
crop rotation
see also conservation crop rotation (328)
environmental outcomes, 166–167
as part of IPM, 253
cropland conversion
air quality effects, 67
environmental outcomes, 67–68
scientific documentation, 68
soil management practice, 64–68
soil quality effects, 66–67
water conservation effects, 67
water quality effects, 64–66
crops
residue management effect on yields, 21–22
resistant varieties, 253
row crops and IPM, 254–260
selection for manure application, 178
cross-wind ridges (589A) for pesticide mitigation, 209–210
cross-wind stripcropping (589B) for pesticide mitigation, 209–210
cross-wind trap strips (589C)
for pesticide mitigation, 209–210
wind erosion control practice, 62–63
CRP (Conservation Reserve Program), 64–66
cultural controls
as part of IPM, 253–254
pest management practice, 205
D
dams (402), 291–292
deep tillage (324)
definition, 4
for pesticide mitigation, 210
residue management practice, 26–31
dikes (356) for pesticide mitigation, 206
ditches. see hillside ditches (423)
diversions (362)
environmental effects, 92
for pesticide mitigation, 206
water management practice, 100–101
water quality effects, 101
drainage water management (554)
for pesticide mitigation, 210–211
water conservation effects, 113–116
water management practice, 112–116
water quality effects, 113–116
drains. see subsurface drains (606); surface drains (607, 608)
drift
pesticide, 203-204
spray, 198
E
early succession habitat management (647), 275
economics
driving factor in environmental outcome, 30
of IPM, 261–262
of pesticide use, 254
environmental outcomes
anionic polyacrylamide (PAM) erosion control (450), 43
conservation buffers, 57–58
conservation covers (327), 67–68
conservation crop rotation (328), 35
cover crops (340), 40, 40–41
cropland conversion, 67–68
IPM, 261–262
irrigation water management (449), 139–142
landscape management practices, 305–308
nutrient management (590), 151–154, 166–172
of pesticide use, 197–198
residue management practices, 29–31
saline and sodic soil management (610), 48
enzymes in feed, 161
erosion control, 42–44, 59–63
see also anionic polyacrylamide (PAM) erosion control (450)
ethanol industry, 161–162
eutrophication, 153–154

F
farm-gate decisions
livestock selection, 162
nutrient balance, 152, 155–156
nutrient management (590), 159–162
farming, contour (330)
for pesticide mitigation, 208–209
soil management practice, 63–64
feed management (592)
enzymes, 161
high-P feed from ethanol industry, 161–162
low phytate corn, 161
nutritional requirements, 160
fertilizers, commercial, 173–175
field borders (386)
air quality effects, 57
definition, 49
environmental outcomes, 57–58
for pesticide mitigation, 206
scientific documentation, 58–59
soil quality effects, 55–57
water conservation effects, 57
water quality effects, 49–55
filter strips (393)
air quality effects, 57
definition, 49
environmental outcomes, 57–58
for pesticide mitigation, 211
scientific documentation, 58–59
soil quality effects, 55–57
water conservation effects, 57, 104–106
water management practice, 103–106
water quality effects, 49–55, 101
floodwater diversion (400) for pesticide mitigation, 206
forage harvest management (666) for pesticide mitigation, 206

G
genetic engineering as part of IPM, 254–255
Goodwin Creek watershed case study, 293–297
grade stabilization structures (410)
for pesticide mitigation, 206
water conservation effects, 107
water management practice, 106–107
water quality effects, 107
grassed waterways (412)
for pesticide mitigation, 211–213
water conservation effects, 102–103
water management practice, 101–103
water quality effects, 102–103
grazing land mechanical treatment (548) for pesticide mitigation, 206
grazing, prescribed (528A) for pesticide mitigation, 207
ground water depth, environmental concerns of, 168–169

H
habitat management
disturbance, 275
ecosystem management, 275
early succession (647), 275
restoration/management of declining (643), 275
stream improvement/management (395), 275
upland wildlife (645), 275
wetland wildlife (644), 275
hay and pasture planting (512) for pesticide mitigation, 207
hedgerow planting (442) for pesticide mitigation, 209–210
herbaceous wind barriers (603)
for pesticide mitigation, 209–210
wind erosion control practice, 59–60
hillside ditches (423)
for pesticide mitigation, 206
water management practice, 100
water quality effects, 101
hydrological conservation, 133–134

I
impoundments, 222
in-stream practices, 288–293
infiltration, increasing, 119–122
integrated pest management (IPM)
development of a paradigm, 245–246
economics vs environment, 261–262
environmental impacts, 260
implementation, 252–253
management thresholds, 202
national program, 246–247
research priorities, 262
for row crops, 253–259
trends in, 260–261
inter-row damming (640)
water conservation effects, 119–122
water management practice, 119–122
water quality effects, 119–122
interactions and tradeoffs
landscape management practices, 308–309
nutrient management (590), 180–181
pesticide management practices, 221–222
residue management practices, 68
water management practices, 124
IPM. see integrated pest management (IPM)
irrigation efficiency, 133
irrigation land leveling (464)
for pesticide mitigation, 213
water management practice, 135–137
irrigation pipelines (430), 135, 136
irrigation pumps (533), 134–135
irrigation regulating reservoirs (552), 134
irrigation storage reservoirs (436), 134–135
irrigation tailwater recovery (447)
for pesticide mitigation, 213–214
water management practice, 135–137
irrigation water delivery systems, 134
irrigation land leveling (464), 136–137
irrigation pipelines (430), 135, 136
irrigation regulating reservoirs (552), 134
irrigation storage reservoirs (436), 134–135
open-channel conveyances (582), 135
pond linings (521), 134
pressurized, 137–138
pumping plants (533), 134–135
surface and subsurface (443), 135–137
tailwater recovery (447), 135–137, 213
irrigation water management (449)
categories of, 133–134
irrigation-induced soil erosion, 141–142
leaching losses, 140–141
for nutrient management, 153
overview, 138–139
for pesticide mitigation, 206, 214
saline soil management (610), 139–140
soil quality effects, 142

L
land forming, precision. see precision land forming (462)
land leveling. see irrigation land leveling (464)
land smoothing (466)
for pesticide mitigation, 206
water conservation effects, 118
water management practice, 118–119
water quality effects, 119
landscape management practices
case studies, 293–305
environmental outcomes, 305–308
in-stream, 288–293
overview, 272–273
research priorities, 308–309
riparian, 277–283
terrestrial ecosystem restoration, 273–277
tradeoffs, 308–309

for pesticide mitigation, 206
<table>
<thead>
<tr>
<th>Term</th>
<th>Definition/Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>A</strong></td>
<td></td>
</tr>
<tr>
<td>Abandonment</td>
<td>In agriculture, the practice of stopping the use of a piece of land to prevent degradation.</td>
</tr>
<tr>
<td><strong>B</strong></td>
<td></td>
</tr>
<tr>
<td>Bank full</td>
<td>The highest point on a streambank or river bank.</td>
</tr>
<tr>
<td>Bankfull</td>
<td>The high bank of a stream or river. The bankfull is the highest point on the streambank.</td>
</tr>
<tr>
<td><strong>C</strong></td>
<td></td>
</tr>
<tr>
<td>C factor for USLE</td>
<td>In universal soil loss equation (USLE), the C factor represents the effect of residue management.</td>
</tr>
<tr>
<td><strong>D</strong></td>
<td></td>
</tr>
<tr>
<td>Drainage</td>
<td>Systems designed to manage water movement.</td>
</tr>
<tr>
<td><strong>E</strong></td>
<td></td>
</tr>
<tr>
<td>Economic feasibility analysis (EFAs)</td>
<td>A method to assess the economic viability of agricultural practices.</td>
</tr>
<tr>
<td><strong>F</strong></td>
<td></td>
</tr>
<tr>
<td>Filter strips</td>
<td>Systems consisting of vegetation (trees, shrubs) or other barriers to reduce wind erosion and water loss.</td>
</tr>
<tr>
<td>Flatway</td>
<td>In construction, a level, horizontal course.</td>
</tr>
<tr>
<td><strong>G</strong></td>
<td></td>
</tr>
<tr>
<td>Gully</td>
<td>A steeply-cut, narrow depression in the surface caused by running water.</td>
</tr>
<tr>
<td><strong>H</strong></td>
<td></td>
</tr>
<tr>
<td>Habitat protection</td>
<td>Systems designed to protect beneficial species from habitat destruction.</td>
</tr>
<tr>
<td><strong>I</strong></td>
<td></td>
</tr>
<tr>
<td>Irrigation</td>
<td>The practice of applying water to the land for the purpose of growing crops.</td>
</tr>
<tr>
<td><strong>J</strong></td>
<td></td>
</tr>
<tr>
<td>Landscape management practices</td>
<td>Natural or artificial systems implemented to promote ecosystem health and reduce soil erosion.</td>
</tr>
<tr>
<td><strong>K</strong></td>
<td></td>
</tr>
<tr>
<td>K factor for USLE</td>
<td>In universal soil loss equation (USLE), the K factor represents the effect of water management practices.</td>
</tr>
<tr>
<td><strong>L</strong></td>
<td></td>
</tr>
<tr>
<td>Leaching</td>
<td>The movement of water through soil or other sediments, resulting in nutrient leaching.</td>
</tr>
<tr>
<td><strong>M</strong></td>
<td></td>
</tr>
<tr>
<td>Mains/laterals</td>
<td>Systems consisting of vegetation (trees, shrubs) or other barriers to reduce wind erosion and water loss.</td>
</tr>
<tr>
<td><strong>N</strong></td>
<td></td>
</tr>
<tr>
<td>Noise pollution</td>
<td>Airborne pollution that interferes with human auditory senses.</td>
</tr>
<tr>
<td><strong>O</strong></td>
<td></td>
</tr>
<tr>
<td>Orchard</td>
<td>A plot of land where trees are planted for fruit or nut production.</td>
</tr>
<tr>
<td><strong>P</strong></td>
<td></td>
</tr>
<tr>
<td>Permeability</td>
<td>The ability of a material to allow water to pass through it.</td>
</tr>
<tr>
<td><strong>Q</strong></td>
<td></td>
</tr>
<tr>
<td>Quality of the environment</td>
<td>The degree to which the environment meets or fulfills human needs and other conditions.</td>
</tr>
<tr>
<td><strong>R</strong></td>
<td></td>
</tr>
<tr>
<td>Rainfall</td>
<td>The amount of water falling from the atmosphere.</td>
</tr>
<tr>
<td><strong>S</strong></td>
<td></td>
</tr>
<tr>
<td>Streambank/shoreline protection</td>
<td>Systems designed to protect the shore or bank of a stream or river from erosion and damage.</td>
</tr>
<tr>
<td><strong>T</strong></td>
<td></td>
</tr>
<tr>
<td>Tailwater recovery, irrigation (447)</td>
<td>The practice of collecting and using water that flows out of the end of a tile line or subsurface drainage.</td>
</tr>
<tr>
<td><strong>U</strong></td>
<td></td>
</tr>
<tr>
<td>Upland wildlife habitat management</td>
<td>Systems designed to protect or restore wildlife habitat on upland areas.</td>
</tr>
<tr>
<td><strong>V</strong></td>
<td></td>
</tr>
<tr>
<td>Vegetation, permanent</td>
<td>Natural plant species that grow and spread continuously without human assistance.</td>
</tr>
<tr>
<td><strong>W</strong></td>
<td></td>
</tr>
<tr>
<td>Waste storage facilities</td>
<td>Systems designed to store and manage waste products.</td>
</tr>
<tr>
<td>Waste utilization</td>
<td>Systems designed to manage waste products in a manner that reduces environmental impacts.</td>
</tr>
<tr>
<td><strong>X</strong></td>
<td></td>
</tr>
<tr>
<td>Xeriscape</td>
<td>A landscape managed to reduce water use and conserve natural resources.</td>
</tr>
<tr>
<td><strong>Y</strong></td>
<td></td>
</tr>
<tr>
<td>Yield</td>
<td>The amount of a crop harvested from a field or piece of land.</td>
</tr>
<tr>
<td><strong>Z</strong></td>
<td></td>
</tr>
